Regolamento REACH. Più sicuro l'ambiente, più sicuri noi- SCADENZA 31 MAGGIO 2018

Sui canali tv e radio della RAI e sul WEB è in corso una campagna di sensibilizzazione del Ministero dell'Ambiente e della Tutela del Territorio e del Mare sulla registrazione delle sostanze chimiche prevista dal regolamento REACH.

Il 31 maggio 2018 scadranno i termini per la registrazione delle sostanze. Tutte le imprese che producono o importano sostanze chimiche nei paesi dell'Unione Europea dovranno registrarle entro quella data. La registrazione delle sostanze chimiche consentirà una maggiore protezione dell'ambiente e della salute umana. Lo spot della campagna (<https://vimeo.com/221702788>) richiama l'attenzione su come le sostanze chimiche siano parte della vita quotidiana e quanto sia necessario farne un uso attento e consapevole per tutelare la salute dell'uomo e dell'ambiente .

Se importi o produci sostanze chimiche ha l'obbligo di registrarle.

L'innovazione come leva per la competitività del sistema imprenditoriale regionale - Centro ENEA Portici , 12 Luglio 2017 dalle 14:30 alle 17:30

Crescita e competitività rappresentano due obiettivi strategici nelle agende Nazionali e Regionali in tema di innovazione d'impresa. Molteplici i driver che possono contribuire a integrare e ottimizzare le interazioni all'interno dell'ecosistema regionale dell'innovazione. Organizzato dall'ENEA, in qualità di partner di Enterprise Europe Network, il seminario fornirà un quadro completo delle determinanti che sottendono l'introduzione e la gestione dell'innovazione nel panorama imprenditoriale, italiano e locale, verticalizzando sulle politiche regionali a sostegno di tali dinamiche. Ampio spazio sarà dedicato all'analisi del paradigma "capitale umano – innovazione", a dimostrazione dell'esistenza di un forte potenziale innovativo che, sempre più spesso, si manifesta nell'emersione di brillanti start-up.

SEP Report 2017 : la situazione delle startup

Il giro d'affari delle 4mila scaleup europee ammonta a 58 miliardi di dollari. Sono questi i numeri dello Startup Europe Partnership Report 2017 redatto dall'associazione Mind the Bridge-Startup Europe Partnership e presentato recentemente al Parlamento Europeo, alla presenza del Presidente Antonio Tajani. Il report rappresenta ad oggi l'analisi più completa sullo stato delle startup innovative europee e mostra un notevole incremento del numero delle scaleup negli ultimi anni (in media, il 67% risulta fondato dopo il 2010). Il documento include inoltre informazioni sulle scaleup e sul fundraising in tutto il territorio europeo (oltre 30 Paesi), confrontando i dati sul capitale raccolto, sulla crescita annuale e sulla percentuale del PIL investito. I numeri permettono di osservare come il mercato europeo sia ampiamente dominato dal Regno Unito, che da solo rappresenta il 34% delle scaleup per 20,2 miliardi di finanziamenti, una quota pari al 35% di tutti i capitali disponibili in Europa. Questo aumenta le preoccupazioni circa l'impatto potenziale della Brexit sul mercato delle scaleup in Europa: infatti, secondo le stime fornite nel report, l'uscita del Regno Unito ridurrà il mercato Scaleup Europe del 36%. A seguire nel ranking, le startup mature si concentrano in Germania e Francia mentre l'Italia occupa l'11° posto, con 135 imprese e circa 900 milioni di capitali in circolo

Opportunità di mercato

Business Offer

French company producing anti-rodent solutions is looking for trade intermediary services (BOFR20170427001): A French SME has developed a wide range of anti-rodent solutions. A commercial agency and/or a distribution services agreement is sought in Czech Republic, Germany, Italy, Spain and Poland with commercial agents, distributors or value added resellers in contact with companies in charge of the technical maintenance of railway and other transport companies, national electrical or telecommunication networks, internet and energy providers, aviation and other industrial companies.

UK based drone specialist offers bespoke development of small unmanned aerial systems (SUAS) and robotic technologies(BOUK20170601001) UK based drone company is offering research and development of small unmanned aerial systems (SUAS) and robotic technologies through innovation and system integration together with construction of drones, training for their use and ongoing technical support. Service agreements are offered to global businesses to initiate and improve their SUAS capabilities in various sectors which include: Survey and inspection; Emergency services; Construction; Agriculture; Security; Defence.

Distributors in Europe and USA for innovative solution of traceability on glass (BOFR20161125001) French SME has developed with a research institute an innovative solution of unique, visible or invisible coding dedicated to traceability on glass. This solution is deposited by inkjet and grafted into glass thanks to optically active components. They are looking for distributors in Europe and United States of America.

French company offering a new communication tool by scanning print works and viewing digital assets with augmented reality on a smartphone or tablet looks for communication or web agencies (BOFR20160617001) A French company specialized in augmented reality developed a web application (editor) providing a new service of linking digital assets to print works (books, magazines, etc). Then, using this mobile app (player) and targeting the book or the magazine will allow seeing and interacting with the linked digital assets. They are looking for communication or web agencies whose clients have print works to be made interactive for distribution services or commercial agency agreement.

An Estonian leading company in the field of producing and selling Siberian larch products is looking for new partners (BOEE20170614001) An Estonian leading company in the field of producing and selling Siberian larch products (unedged carpentry timber, edged saw-timber, wrought timber, roof shingle, garden products from larch) is looking for new partners under

commercial agency or distribution services agreement, as well as manufacturing agreement or reciprocal production.

The German SME is a specialist for internal inspections of rotor blades and is offering distribution services agreement (BODE20170407001) German company active in development, manufacturing, sales and service of video inspection systems for pipelines and sewers as well as boreholes has developed an internal inspection system for rotor blades.

With this system a blade in vertical position can be inspected with a high resolution rotary swivel head camera and a measurement laser. The company wants to expand its activities to foreign countries and therefore it is offering distribution services agreements.

Business Request

German company specialising in online trade of festive clothing for children is looking for new suppliers and offers manufacturing agreements (BRDE20170622001) The micro-sized German company trades online with festive clothing for boys, girls, babies and teenagers for baptism, communions, weddings etc. It offers manufacturing agreements to clothing manufacturers and seeks suppliers of festive clothes for children in good quality-price ratio.

UK company seeks manufacturer to produce water bottles and water resistant pouches (BRUK20170621001) A UK company has designed an innovative new school product, a water bottle, which fits into a water bottle pouch. Due to increased demand the company seeks to find a new manufacturer to make both the water resistant pouches and the plastic water bottles.

Bulgarian company specialized in spare parts trade is looking for suppliers (BRBG20170608001) Bulgarian company is dedicated to distribution and sale of auto spare parts for European, Korean, Japanese cars, trucks and special machines. The company is looking for new suppliers of spare parts under distribution service agreements or commercial agency agreements.

French company is looking for subcontractors in European countries in the sector of electric drives and electro magnetic solutions. (BRFR20170607001) A French company in the field of electric motor and generator design is looking for subcontractors in the same sector, in Europe. This company customizes products with different options adapted to the customers' requirements and would like to enlarge its solutions and expertise.

A Hungarian company, specialized in the distribution of medical devices and of dietary supplements for special medical purposes, is looking for products to complete its range (BRHU20170530001) A Hungarian SME, which deals with the distribution of health related products (medical devices, dietary supplements) is open to various cooperation possibilities based on trade intermediary services. The company is looking for new products to widen its range of products, especially nutraceuticals and medical devices. The company is looking for partners from the European Union and Switzerland.

UK supplier to the healthcare sector requests innovative decontamination, sterilisation, and infection prevention solutions for distribution services agreement (BRUK20160630001) An established and highly respected UK South West company specialised in the distribution of infection prevention, sterilisation and decontamination solutions to the NHS (National Health Service) and private healthcare providers seeks unique and novel solutions under distribution services agreements.

Corrugated boards are requested by an SME from Poland under manufacturing agreement (BRPL20170601001) A Polish producer of cardboard boxes is looking for companies from the pulp and paper industry that can provide corrugated boards of the following specification: 620

G.S.M. (grammes per square metre) and 1 300 G.S.M.; 'BC' flute, grey, foamed at one side. Cooperation in a form of manufacturing agreement is requested.

Technology Offer

A kit for predicting the therapeutic response to antipsychotic drugs (TOES20170529001) A Spanish healthcare research institute has developed a method for predicting, before treatment, the individual clinical response to antipsychotic medication in subjects suffering from psychosis disorders. The institute would like to get in contact with companies interested in commercializing this kit under a license agreement or a services agreement to test the drugs. Also a research cooperation agreement to develop the kit will be considered.

consumer focused energy management system (TOKR20170228003) A Korean R&D institute specialized in smart energy systems and optimum design technology has developed a consumer focused energy management system (EMS). It is an innovative solution to reduce the inconvenience, and increase the efficiency of energy storage system (ESS). The institution has already developed the system and is ready to commercialize. It is looking for companies that are interested in the system and wish to conclude a license agreement.

Biobank of patients with acute or chronic cardiac diseases for testing of new diagnostics or biomarkers (TOCH20170619001) An academic research group from Switzerland offers a biobank of blood samples collected from patients undergoing evaluation for myocardial infarction, heart failure, syncope, and coronary artery disease, collected in multicenter projects. They are looking for research cooperation partners interested in testing new diagnostic or prognostic biomarkers in patients after confirmation in animal models. The goal is to develop faster diagnostic pathways in clinical cardiology and emergency medicine.

Method for coating titanium vascular stent, artificial heart valves and other medical devices (TOSI20170613001) A Slovenian research institute offers technology for surface treatment of titanium vascular stents and other medical devices. The developed method reduces adhesion and activation of platelets on medical devices. Surfaces produced can be used for stents and artificial heart valves in order to reduce thrombus reactions on the implant material surface. Producers of vascular stents and other medical devices are sought for licence or technical cooperation agreement.

Innovative wheel for vehicles that predictably increases grip when taking a curve. (TOES20170623001) A Spanish SME specializing in the development of innovative products for the automotive and mobility industry has designed and patented an innovative wheel for vehicles that predictably increases grip when taking a curve. The company is looking for partners to develop a prototype of the wheel in order to carry out field tests, evaluations and product demonstrations. For this purpose it offers technical cooperation and financial agreements.

New method for personalized mood recognition through video analysis of facial expressions (TOES20170606001) A research group in mathematics and the computer science department of a Spanish university have developed a new method capable of recognizing the mood of a person through the video analysis of facial expressions. The research group is looking for large companies or SMEs in video game or health sectors that want to carry out a license agreement to exploit their technology

Technology Request

Diagnostic technologies for oral care (TRBE20170608001) A Belgian multinational active in consumer goods looks for diagnostic technologies, products, devices, or techniques applicable in the field of oral care. The solutions sought will enable the consumer to monitor their health (including habits & behaviors), identify areas of concern, and drive good health practices. Technical collaboration or license agreements are sought with industry or R&D centres.

Large Dutch accountancy is looking for innovative SME's in the field of conceptual design, interaction design and ICT (TRNL20170609001) A leading Dutch accountancy, consultancy and tax firm is looking for new ways to interact with and report to their clients.

The company is looking for innovative SME's in the field of conceptual design, interaction design and ICT. The company aims to eventually adopt a new solution in the frame of a services agreement and is open to co-develop this solution in the frame of a technical cooperation agreement.

Dutch multinational is looking for innovative technologies to recycle end-of-life plastics (TRNL20170614001) The Dutch company is globally active and a major producer of specialty chemicals supplying the entire polymer chain with products that help to make and modify polymers. The company is looking for carbon friendly technologies to recycle end-of-life plastics, especially in areas that complement their existing technologies e.g. polyolefins. Cooperation with partners would be in the frame of a research or a technical cooperation agreement.

High performance Nano materials filter (TRKR20170131003) A Korean SME active in the field of Nano material filter is looking for partners with expert knowledge in respiratory system protection. The company seeks a commercial agreement partner capable of providing the technology at this scale on an economic basis for design, installation and demonstration. License and/ or manufacture agreement is also sought.

Innovative refrigeration energy recovery system seeks manufacturer (TRUK20170623001) A UK company has developed a novel system for recovering energy from refrigeration/air-conditioning. The system utilises gravity feed pressure vessels in a novel manner whilst exploiting the installed systems operating pressures. This offers end users the option of direct electricity recovery whilst simultaneously improving co-efficient of performance. They are seeking manufacturers & engineering partners to co-develop & produce the device, via manufacturing or technical cooperation agreement.

Curtains and cover sheets for hospitals and hygiene institutions (TRKR20170126001) A Korean SME is looking for technology that manufactures materials to make curtains and cover sheets for hospitals and hygiene institutions. The company is specialised in manufacturing functional textile materials. The company is open for commercial agreement with technical assistance, license agreement, manufacturing agreement.
